

TDS POLYCAST® Channel Data

Available Channels

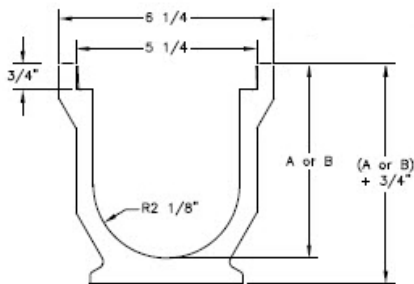

Trench Drain Systems offers a broad range of channels for POLYCAST® including neutral, half, transition and standard sloping channels. Standard channels provide a .6% sloped drainage run of 120'. Additionally, there are several variations of catch basins that maximize the capabilities of the entire system.

💧 TDS POLYCAST® exclusive products

💧* TP0650S Shallow/stackable catch basin that transitions to a T or L

All half and neutral channels have bottom embossed knock outs for outlets.
