

CATCH BASIN 12" x 24"

SS651

The SS651 inline catch basin is fabricated from 304 stainless steel. Optional 316 stainless steel is available.

Catch basin inlets and outlets can be configured and fabricated in multiple ways depending on customer's needs.

Catch basins are located at the start of the run. Channels are then added going uphill from the catch basin.

SS651 DEBRIS BASKET

Debris Baskets for the SS651 catch basin are designed to catch small solids before they enter your drain system.
