

CATCH BASIN 24" x 24"

SS653

The SS653 inline catch basin is fabricated from 304 stainless steel. Optional 316 stainless steel is available.

Catch basin inlets and outlets can be configured and fabricated in multiple ways depending on customer's needs.

Catch basins are located at the start of the run. Channels are then added going uphill from the catch basin.

SS653 DEBRIS BASKET

Debris Baskets for the SS653 catch basin are designed to catch small solids before they enter your drain system.
