SS600

CATCH BASIN 6.25” x 24”

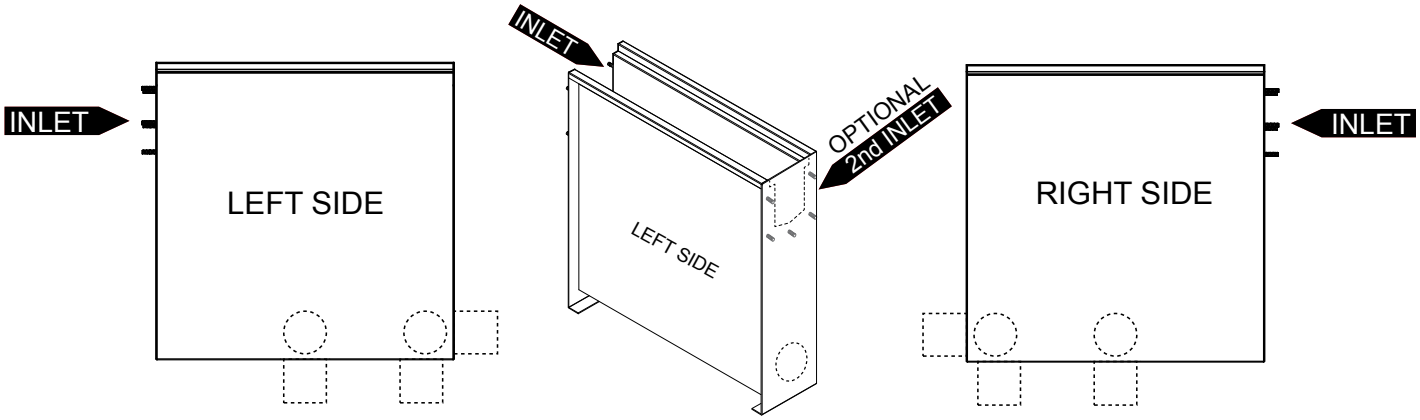
SS650

The SS650 inline catch basin is fabricated from 304 stainless steel. Optional 316 stainless steel is available.

Catch basin inlets and outlets can be configured and fabricated in multiple ways depending on customer’s needs.

The SS650 Catch Basin uses the same grates as the SS600 channels.

Catch basins are located at the start of the run. Channels are then added going uphill from the catch basin.



SS650 DEBRIS BASKET

Debris Baskets for the SS650 catch basin are designed to catch small solids before they enter your drain system.
