

# POINT DRAINS

## Spee-D Basins

**Excellent for residential & light duty applications, including hardscapes, courtyards & patios.**

The NDS Spee-D Basin is a 6" diameter catch basin used in yard drainage. Set under downspouts or at low points in the yard, the Spee-D Basin is a convenient, easy to install basin for homeowners. The Spee-D Basin offers up to 4 outlets with either 3" or 4" diameter pipe connections, which changes the degree of water evacuation.

The Spee-D catch basin system has a number of 6" grating options. The 6" square grate (available in brass and three colors of plastic) has a styrene adapter that converts the square to fit the circular basin. Both square grates meet ADA requirements; the plastic 6" grate is also heel-proof.

**NDS-201**  
Double locking outlet  
w/ brass slotted grate
