

POINT DRAINS

12" x 12" Catch Basins

by NDS

NDS 12" x 12" Catch Basins are a complete and flexible drainage assembly. For use in pedestrian and light traffic situations.

Catch basins stop leaves and silt from clogging your pipes by holding the debris in a reservoir. Available with up to four outlets. You will need at least two outlets if the catch basin is added into an existing pipe run.

FEATURES

- Commercial Grade with reinforced shoulders
- Available with up to four outlets
- Choose from 3" & 4" or 6" outlet adapters
- Offset 3" & 4" adapter available for alignment issues
- Plastic slotted grates in black, grey, green or sand
- Decorative plastic grates available
- Optional 6" riser for deeper installation
- Optional filter: spun-bond polypropylene geotextile fabric

LOW PROFILE CATCH BASINS

Excellent where vertical clearance is an issue

Add drainage where there's no room, or no need, for a full catch basin. This fast draining system is designed for bottom outlet into your vertical drainage pipe. Accepts the same grates that fit the 12" x 12" catch basin.

with Baked-on Oil Finish

NEXT GENERATION CATCH BASINS

1200NGB - Flexible output height

The 1200NGB has a unique inlet/outlet system that allows the installer to adjust outlet height to accommodate for different levels of water flow and creates flexible positioning for layouts. All accessories for the regular 12" catch basin also fit the 1200NGB catch basin.
