Bronze Aluminum Fiberglass

NDS® Slim, Mini, Basins
Bronze Age Decorative Grates
for NDS® Products

NDS® Mini and TDS MAX Mini System

TDS offers a variety of decorative grates for the NDS® Mini Channel system and offers an exclusive MAX Mini system. The MAX Mini comes with a metal edge that gives the system a high-end look and goes great with our decorative Bronze Age grates. Available in aluminum, bronze and brushed bronze, and in eight patterns.

Specifications:

- 2.75" x 12" (NDS® Mini Channel)
- Two predrilled countersunk holes per grate
- Rated Class A (Pedestrian Traffic)
- ADA Compliant
- Heel Proof

NDS® Slim Channel System

Trench Drain Systems is the first in the industry to offer metal grates for the NDS® Slim Channel drainage system. These grates are offered in 12" lengths. They mirror the plastic version of the slotted pattern offered by NDS®. The material and finish choices include aluminum, natural bronze and brushed bronze for a polished look.

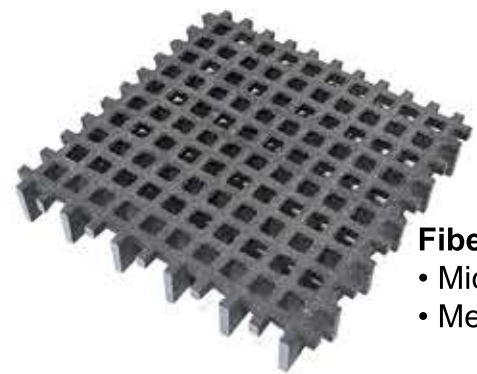

Specifications:

- 2.25" (57.15) x 12" (304.80)
- Two predrilled countersunk holes per grate
- Load Rated Class A (Pedestrian Traffic)
- ADA Compliant

Catch Basins

NDS® makes a wide range of catch basins for residential and light commercial applications. NDS® basins are ideal for patio drainage, downspout water control or yard and garden drainage.

TDS has fiberglass grates that fit the NDS® Catch Basins. Fiberglass is a strong alternative to plastic and metal grates. Several designs are available for low and high flow rates.
