

## RAIN WATER REUSE SYSTEM - LOW COST, LOW IMPACT

Be Water Smart by using a StormChamber™ Water Reuse System for your home.

*Immediate benefits for both individual households and the environment*

### Why StormChamber™ ?

- ✓ Less expensive than other water re-harvesting systems
- ✓ Easily installed, underground and out of sight
- ✓ 1 StormChamber™ with stone surround = 16-22 rain barrels
- ✓ Immediate benefits for both individual households and the environment
- ✓ Save money on water utilities – rain water is free
- ✓ Provide a water source for landscape irrigation, washing cars, without regard for local water restrictions
- ✓ Reduce the impact of storm water on public systems
- ✓ Help prevent street and sidewalk flooding
- ✓ Help to prevent run-off of debris into nearby local waterways

### Rain Water Reuse

Water reuse is one solution. When water supplies become limited, practical solutions such as a StormChamber™ reuse system can fill the gap. Increasing the amount of reclaimed water for home, agriculture and commercial consumers will significantly ease the strain on rivers, lakes, and aquifers that provide us with clean and safe drinking water. Rain water reuse can fill the gap and be used for irrigation, washing cars, pressure washing, landscaping and general lawn watering needs.
